**Raw Material Surcharge (RTZ) as of July 1, 2026**

Dear Sir oder Madam,

due to ongoing changes in the global markets for raw materials, energy, and logistics, costs throughout the supply chain continue to rise.

Thanks to the long-term supply agreements we secured in advance and the continuous improvements we have implemented, we have so far been able to refrain from introducing a raw material surcharge.

To ensure our long-term stability, we will introduce a **Raw Material Surcharge (RTZ) of 2.1 %** effective **July 1, 2026**, to cover part of these increased costs.

We will continue to closely monitor market developments and reserve the right to adjust the Raw Material Surcharge at regular intervals as necessary.

This measure will help us offset a portion of the increased costs while continuing to reliably provide the high quality, delivery performance, and security of supply you expect from us.

Should you have any questions, your usual contacts will be happy to assist you at any time.

We thank you for your support and look forward to continuing our successful partnership.

Yours sincerely,

Michael Klein  
Managing Director
