

Raw Material Surcharge (RTZ) as of July 1, 2026

Dear customer,

Ongoing developments in the international commodities, energy and logistics markets continue to drive up costs throughout the supply chain.

Against this backdrop, we feel compelled to introduce a raw material surcharge (RTZ) with effect from 1 July 2026.

The surcharge will be applied as follows:

- **Steel products: 2.5 %**
- **Textile products: 7.0 %**

This measure is intended to partially offset the increases in raw material and procurement costs whilst continuing to reliably ensure our usual quality, delivery reliability and security of supply.

We will continue to monitor market developments and review the surcharge on a regular basis.

Should you have any questions, your usual contacts are available to assist you at any time.

We appreciate your understanding and thank you for your valued partnership.

Kind regards,

Carlos Carranza
